

The following table lists the recycled content in each of our products. Crossville® became the first tile manufacturer to achieve certification of its waste recycling programs through Scientific Certification Systems, an independent, third-party certifier of recycled claims. And every product made at our facilities is certified because the entire manufacturing process has gained SCS Certification, known as the Crossville Certified Recycling Process. Crossville continues to drive sustainability into the mainstream as it has since 1986.

At Crossville® we put our name behind every product we sell. That's why we have developed the Crossville Recycle Process™ logo which will be shown in conjunction with products manufactured with recycled content. Tile containing a specified minimum amount of recycled content will be designated with a percentage shown in the logo. In addition, this logo will specify the nature of the recycled content (pre-consumer, post-consumer, etc).

♠ Pre-Consumer Recycled Content ♣ Post-Consumer Recycled Content  
Listed percentage is the **minimum** recycled content in each product.  
Actual recycled content may be greater.
